Task Performed

- Need to create a portfolio web page.
- Created an index.html.
- Added a Navigation Bar which is of Unordered List consist of Home, About, Portfolio, Contact.
- Div tag which encloses all the content of index.html.
- Header of h1 tag which indicates ICP2-Portfolio.
- Ordered List mentions the subject it deals with and consists of web, mobile and programming
- Under a div tag we have header of h3 tag which has YouTube video info and a inline span tag, colors the text
- An iframe tag which has a URL link of YouTube.
- Heading h3 tag which inline span tag mentioning Photos in blue color
- Div tag consist of anchor a which inlines image img tag where onclick of this image takes to new tab opening the image with the location.
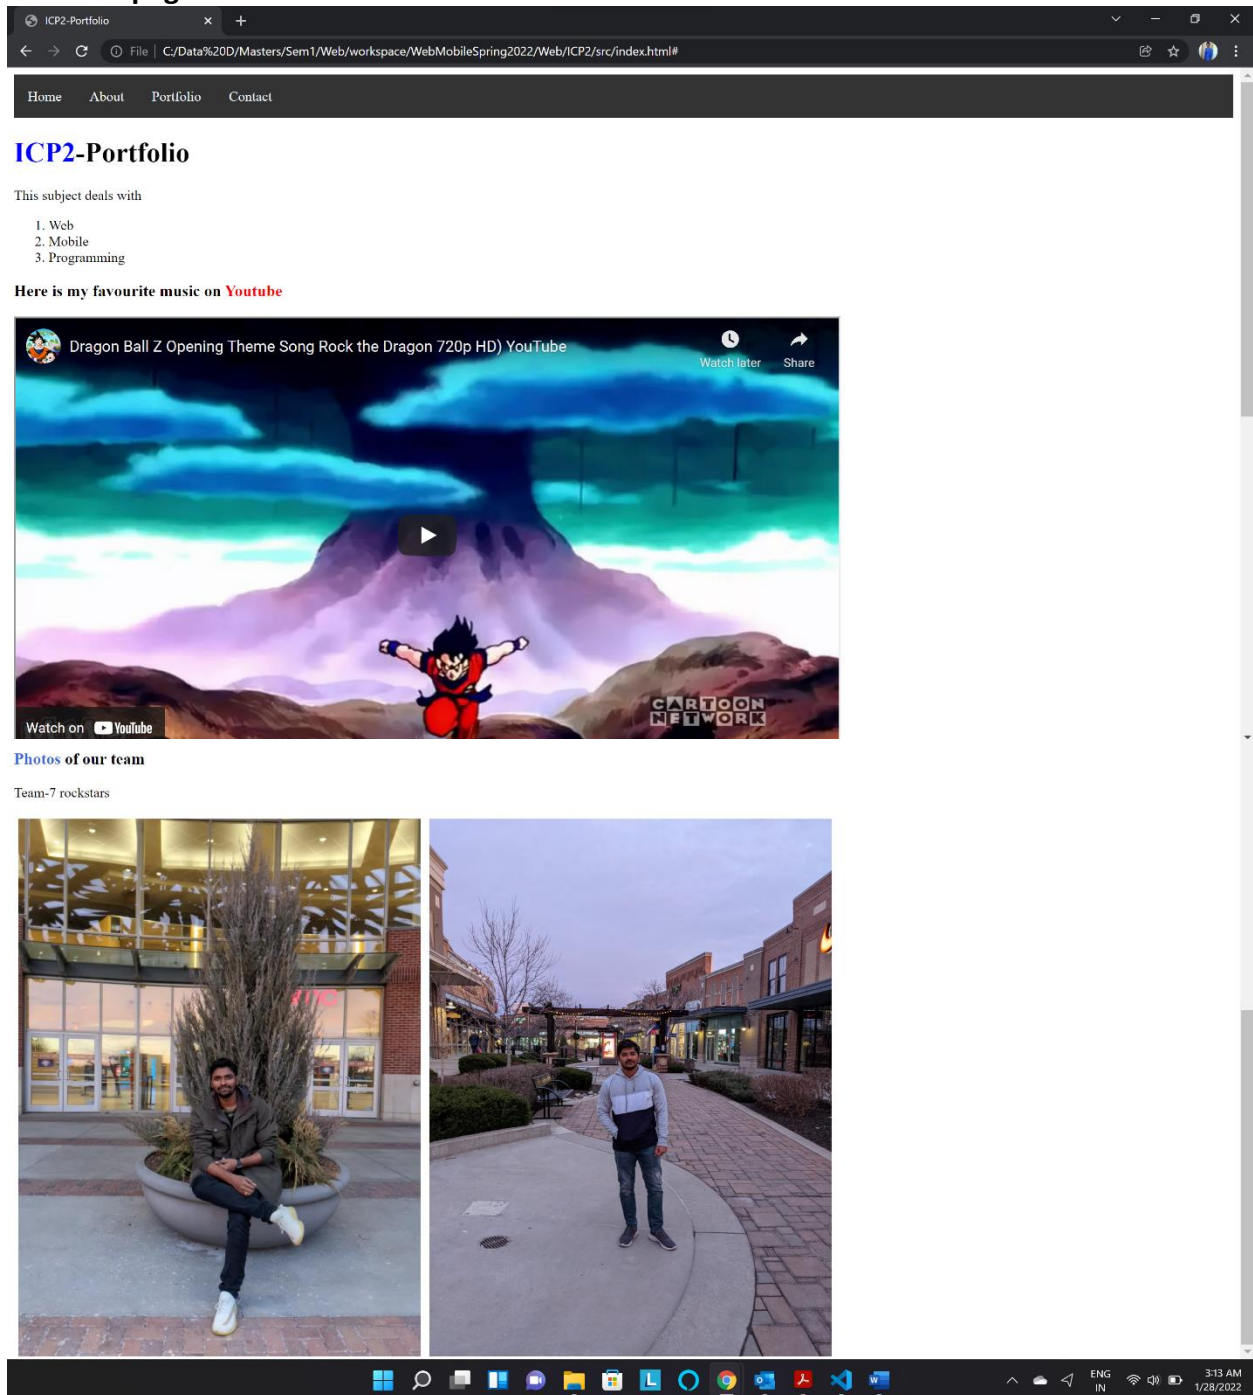

OutCome

From this task we were able to create a prototype of portfolio which includes introduction video and images which describes the portfolio. Learned about the cascading style sheets to create a navigation bar with unordered list and use of Inline elements which makes web page more interesting and colorful. Understood the usage of Iframe to include the online videos and to include it in the portfolio.
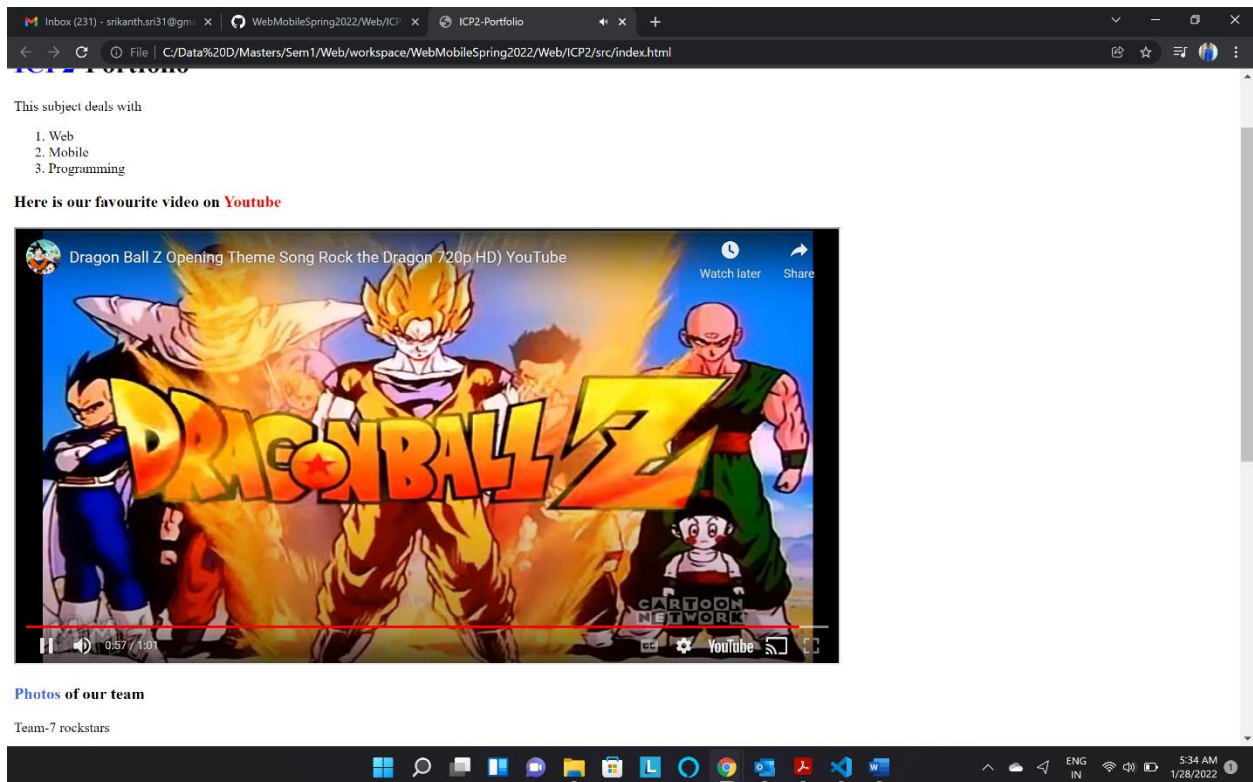

Task Distribution

Work Contributed was equally distributed together.

Task Screenshots:

Portfolio page

Onclick of video play button: Video starts with all the controls including pause,resume,and volume controls.

Onclick of image: It opens a new tab with the image and its path.
